Marking Services Australia Pty Ltd.

# GHS (Globally Harmonized System) Labels and Signs

Marking Services Australia GHS labels and signs are specifically designed to comply with the standards established by the United Nations. Use our labels to identify health, physical and environmental risk hazards; information critical to keep your workplace compliant and safe. Standardized pictograms, signal words and hazard/precautionary statements used on our GHS labels keep workers informed of specific chemical hazards and comply with GHS regulations.

Marking Services Australia offers the best in GHS labeling and signage. We will work with you to create custom GHS labeling designed with your needs in mind. Do-it-yourself label printers are cost prohibitive, time consuming and offer limited size and color options. Need additional information such as NFPA diamonds or HMIS? We can create one label or sign with all the required information based on your specifications, while remaining compliant with GHS regulations.

markserv.com.au

## Label Elements

GHS regulations outline a standardized labeling format. In any GHS sign, there are six key labeling elements that must be adhered to.

- Signal Word** – indicate relative severity of hazard.
- Symbols (Hazard Pictograms)** – convey health, physical and environmental hazards using black symbols on white backgrounds with a red border.
- Product Name or Identifiers**
- Hazard Statements** – phrases that describe the nature of the hazardous product.
- Precautionary Statements** – phrases that describe preventative measures, first aid response, storage and disposal information for the hazardous product.
- Manufacturer Information** – company name, address, telephone number.

Marking Services goes beyond what is required to allow owners to include relevant information for the safe, efficient operations of their facilities. We have worked with OSHA to develop GHS compliant signs and labels that accurately communicate hazards for the protection of plant workers and infrastructure.

## GHS Labeling made easy!

Our process is simple, we work with you to determine your plant specific needs.

### STEP 1

Gather the new Safety Data Sheet (SDS) and any other pertinent information you'd like to include on the GHS Label and/or sign.

### STEP 2

We'll create the artwork using mandatory GHS pictograms and information required by OSHA's new Hazard Communication Standard - 29 CFR 1910.1200 for your review and approval.

### STEP 3

Once approved, we'll manufacture the labels and signs to your specifications.

# Ammonia, Anhydrous: 99.80 - 99.98 %

## DANGER

### HAZARD STATEMENTS:

H221 Flammable gas.  
H331 Toxic if inhaled.  
H314 Causes Severe skin burns and eye damage.  
H400 Very toxic to aquatic life.

### PRECAUTIONARY STATEMENTS:

P405 Store locked up.  
P403 Store in a well-ventilated place.  
P210 Keep away from heat/sparks/open flames/hot surfaces. – No smoking.  
P280 Wear protective gloves/protective clothing/eye protection/face protection.  
P273 Avoid release to the environment.  
P303 + P361 + P353 IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/shower.  
P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.  
P304 + P340 IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing.  
P310 Immediately call a POISON CENTER or doctor/physician.

### FIRST AID MEASURES:

**GENERAL:** If in doubt, seek medical advice.  
If there is any suspicion of ammonia gas left in the emergency area, the rescue workers must wear self-contained breathing apparatus with filter K11. No action shall be taken involving any personal risk or without suitable training.  
**INHALATION:** Provide rest, warmth and fresh air. Rinse nose and mouth with water. If respiratory problems, artificial respiration/oxygen. Get medical attention.  
**SKIN CONTACT:** Promptly flush contaminated skin with water. Promptly remove clothing if soaked through and flush the skin with water. Continue to rinse for at least 15 minutes. Get medical attention immediately.

### DISPOSAL:

Deliver as hazardous waste according to the local regulations.

Marking Services Australia Pty Ltd., 1/29 Mulgool Road, Malaga WA 6090 Australia

**SUPPLEMENTAL INFORMATION:**  
Rapid evaporation of liquid ammonia may cause frostbite

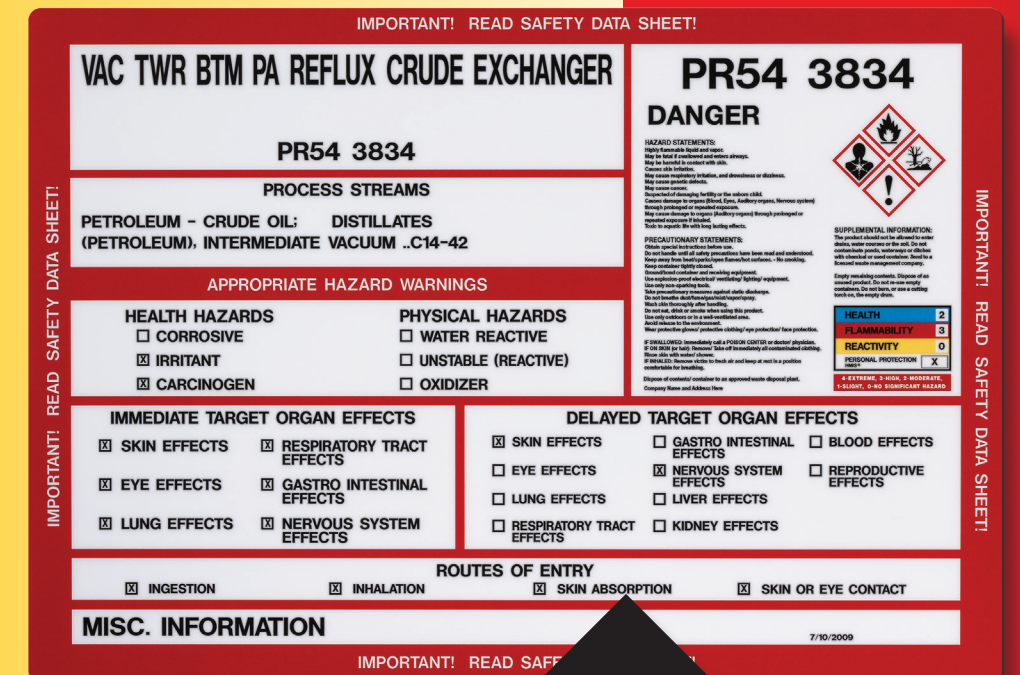

We worked with this client to include NFPA diamonds

**SEE THE S.D.S FOR MORE INFORMATION**

GHS labels and signs from Marking Services are designed and manufactured for plant environments. Our manufacturing processes allow for label and sign materials that have been engineered specifically for your facility.

### MS-215 Max-Tek Signs

- Printing is encapsulated beneath a layer of high-performance polycarbonate
- Resistant to chemicals and fading
- Highest quality material available
- Complete printing flexibility
- Flexible and Rigid constructions based on your mounting and surface needs
