## Engraved Plastic Valve and Equipment Tags

Marking Services, Inc. (MSI) offers engraved plastic valve and equipment tags for identifying and tagging valves, instrumentation, pumps, fans, air handling units and other equipment. Bright, durable valve and equipment identification tags from MSI are engraved on two (2-ply) layers of permanently bonded plastic.

Engraved plastic valve and equipment tags are easy to read providing excellent visibility for important operational information. Ideal for color-coding valves or instrumentation, engraved plastic valve tags feature highly visible engraved text that provides a distinct contrast between letter color and background color.

- Excellent for in-house maintenance programs; use to verify machinery numbers shown on work orders, reducing costly errors and accidental shutdowns. Engraved plastic material is also ideal for providing building graphics and door signs.
- Extremely durable engraved plastic tags are designed for indoor applications, outdoor engraved plastic material also available upon request.
